How to Manage Parent Accounts

Roles that Have Access: Agency Admin, Agency Data Reporting Contact

While parents/guardians fill out their *Hubbe* Family Applications, there may be problems that arise in which applicants will forget their password, type in the wrong email, need a change in email, etc. In order to make managing accounts easier, Admins have the ability to manage parent accounts for the Application Portal right in *Hubbe*. In addition to application accounts, this record houses all parent records in your system that do not have a portal account yet and all those that do have a portal account for which you can assist with password and/or username resets. This saves time trying to help parents/guardians with their accounts, and makes it easy to quickly change an email, rest a username and/or password, update parent PINS, and immediately notify the parents/guardians of the change.

This instruction sheet will explain how to manage parent accounts for both the Application Portal and regular Parent Portal Accounts, including how to reset usernames and reset passwords.
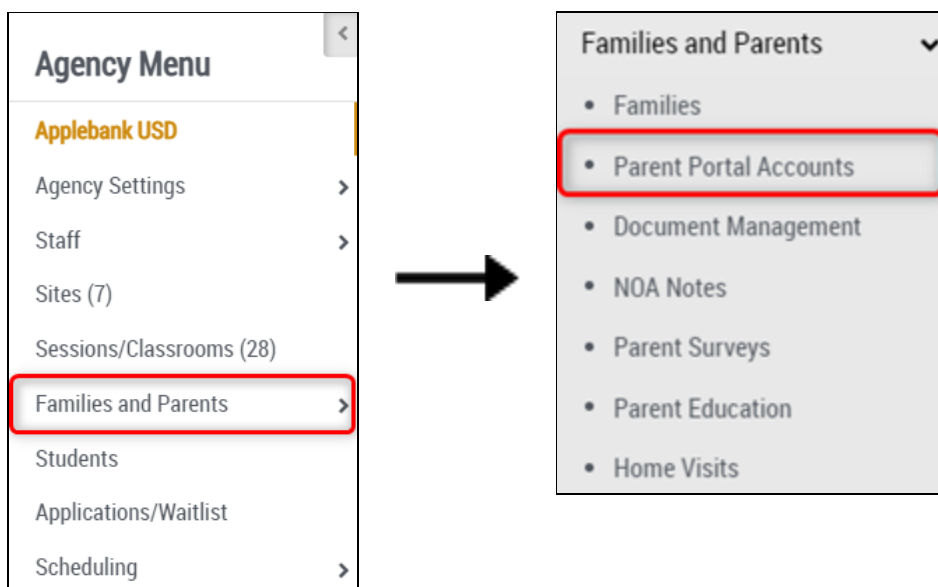

Table of Contents

Click on the topic or page number to jump to the corresponding section of the instruction sheet.

1 From the Agency Menu, click on the Menu item for "Families and Parents" and then click on "Parent Portal Accounts."

2 You will then be directed to the "Parent Accounts" record. This record includes every account with a Family Application, whether the status of the application is Not Started, In Process, Submitted, Revisions Needed, or Approved - as well as all parent records that have a parent portal account created. Those parents with a parent portal account will be listed in the "Parents with Accounts" tab and those without a parent portal account will be listed in the "Parents without Accounts" tab. You can create new parent accounts right from this record, as well as many other features that will be covered in this instruction sheet.

The first tab displayed on the page titled, "Parents with Accounts" includes a grid listing all parents at the agency that have a parent portal account. When a family has been invited to complete a family application via *Hubbe*, the application's account will appear in this tab (with the email associated with the application). This section will review the actions and features available in this tab.

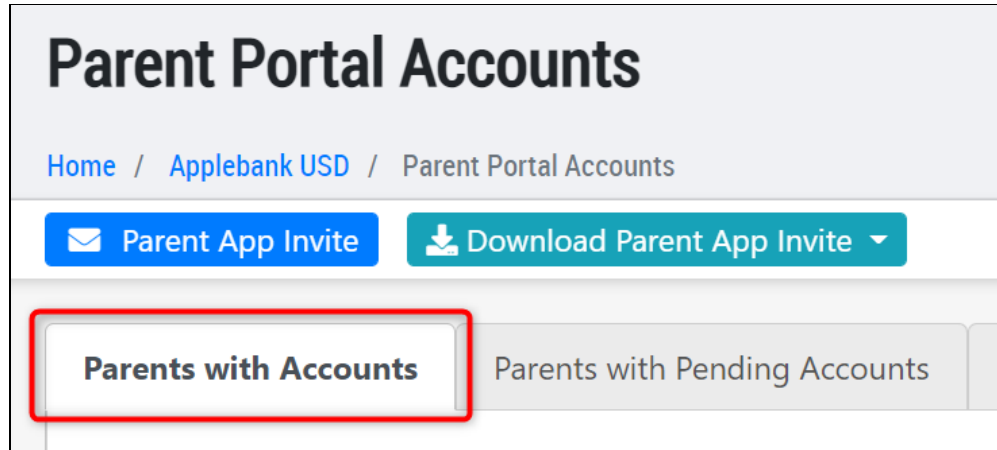

Grid Tools

---

1 There are three (3) action buttons within the grid in the "Parent portal accounts" tab: Copy, Excel, and Print. The "Copy" button will copy all the parent accounts listed in the grid to your computer's clipboard. The "Excel" button will download an Excel copy of the parent accounts listed in the grid. The "Print" button will allow you to print the parent accounts listed in the grid.

2 The grid features search filters and a search field that both influence the "Copy," "Excel," and "Print" buttons in the grid. The criteria applied to the grid, whether by the filters or search field, will be the only parent accounts that show up in your copy, download (Excel), and print.
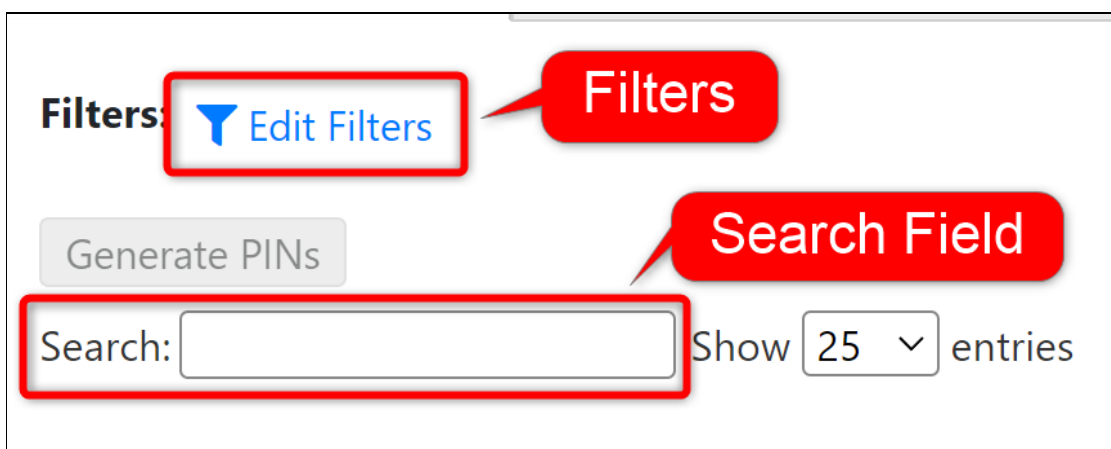

To use the search filters to sort through the grid, click on the blue "Edit Filters" text and select/enter your desired filters.
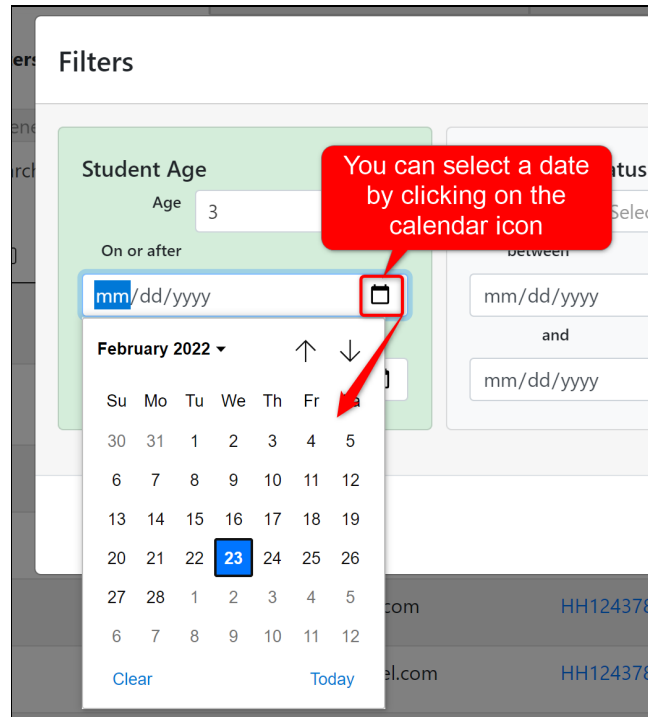

Once you have selected your desired filters, click "Apply filters" to apply all selected filters. If you would like to clear all selected filters, click the "Reset" button.
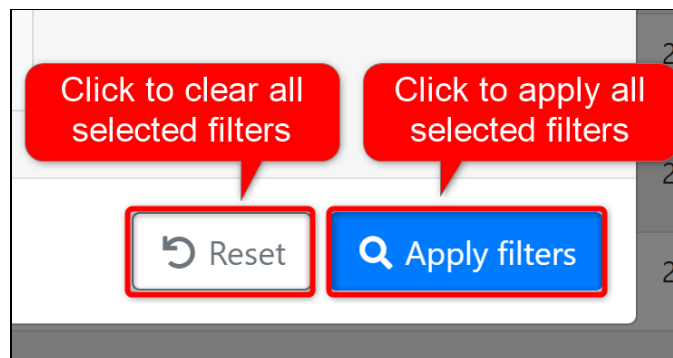

To use the search field, enter the applicable information into the text field, such as the parent name, family name, parent ID, parent PIN, household ID, students, or email.
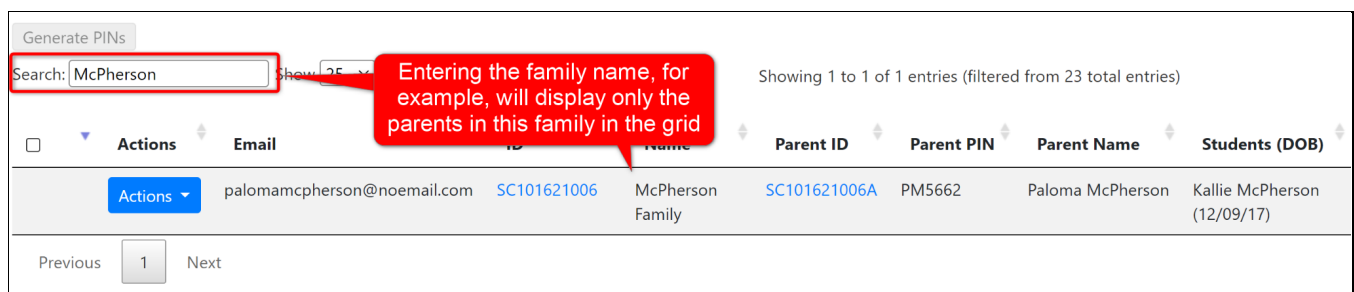

1 The parent PIN is used by the parent to sign into the eSignature portal to mark their child's attendance when they are dropping their kid off/picking their kid up. You can generate the PIN right from the "Parents with accounts" tab, as described below.

To generate a PIN, first click the checkbox next to all the parents you would like to generate a pin for. Then click the "Generate PINs" button above the grid.

Please note that you will only notice a checkbox next to parents who have a parent record in _Hubbe_ and have yet to get a PIN. The parents that do NOT have a checkbox meet one of the two following criteria: a PIN has already been generated for the parent, or the parent has not yet had a parent record created and will need to have a record created before they can get a PIN.
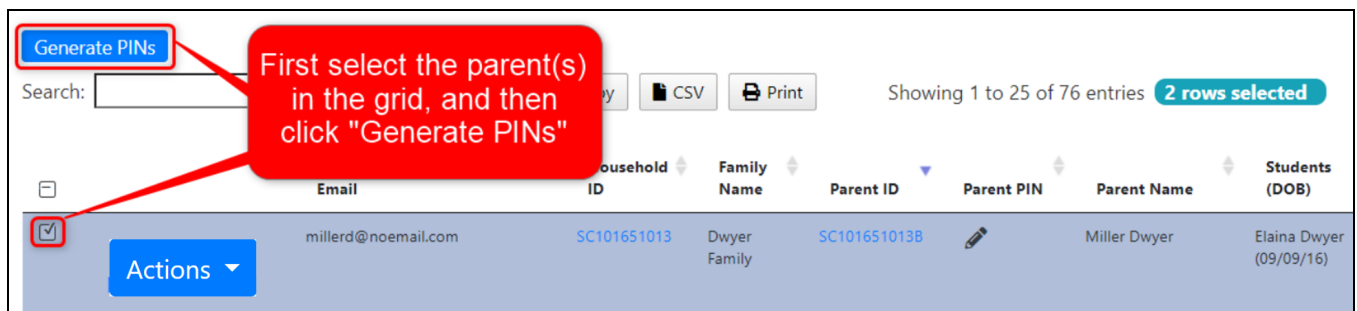

2 In the modal that appears, select whether you would like to send an email to the parent with their new PIN. We highly recommend that you send an email to easily provide the parent their new PIN. Then click "Save."
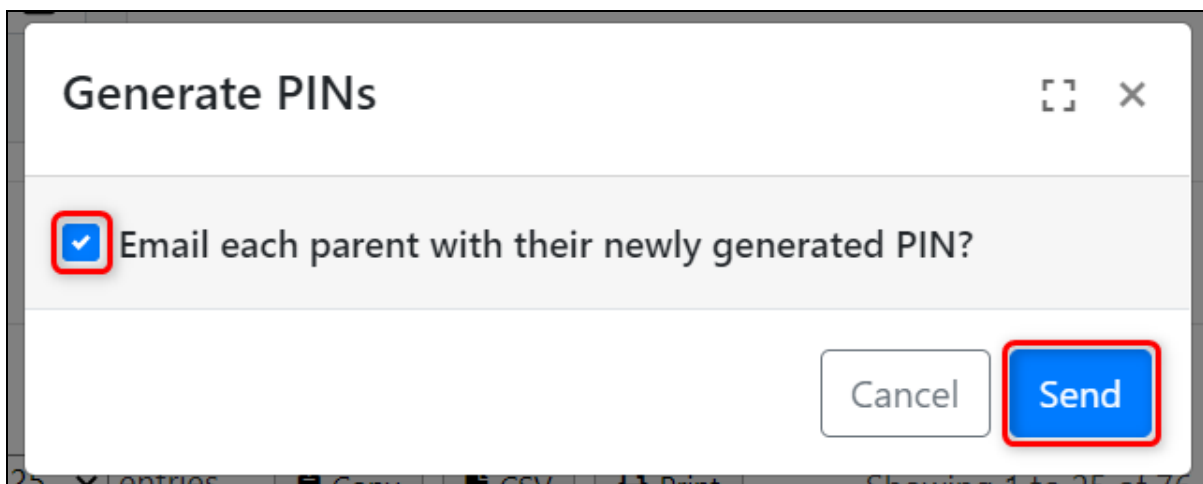

The email sent will look like the one in the image below.
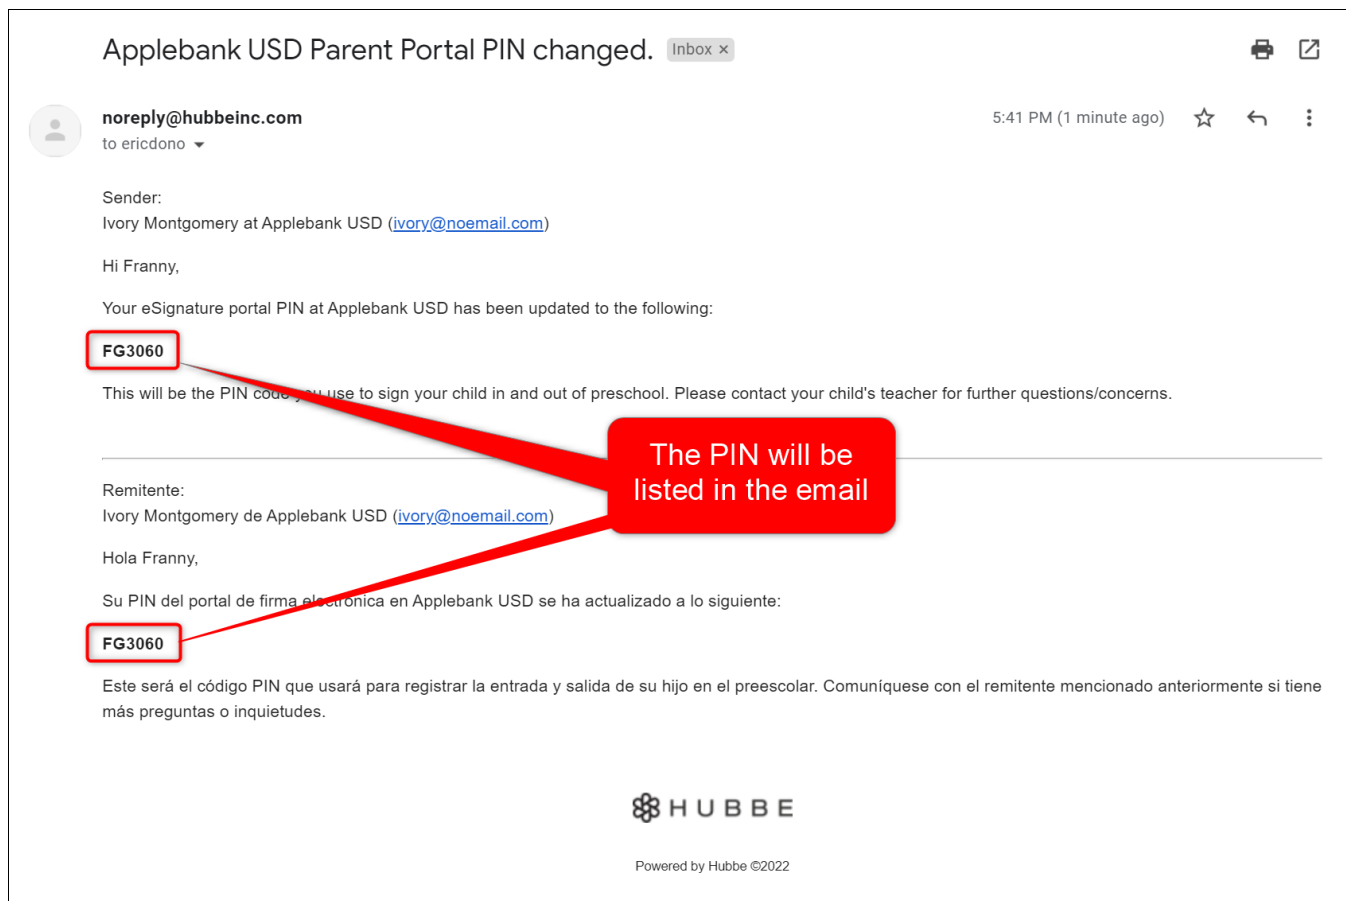

Reset Email/Password/Parent Pin

For parents that already have accounts, there are several actions that can be taken to help resolve issues they may be experiencing. We can assist them directly from the grid.

1 Here you can reset either the email, password, or parent pin for any Parent Portal account. To do so, first locate the family account that you would like to modify. You can use the search bar to quickly look up the email, parent name, or student name. You can also sort each column in either ascending or descending order to easily organize the grid.

2 Once you have located the family account, click the "Actions" button on the left-hand side of the grid. This will expand to show a list of several fields that can be reset.

3 Clicking on the "Reset Email" option will open up the modal shown below. In the text space provided, enter the new parent portal email for this user, and click on the blue "Save" button. This will also send a confirmation email to verify the change.

Please note that the parent portal account's email will **not** be changed **until the parent clicks on the verification link in the email sent to them** *and* **logs in**.

4 Clicking on the "Reset Password" option will open up the modal shown below. Click on the blue "Send" button to email a Reset Password link to the parent's email.
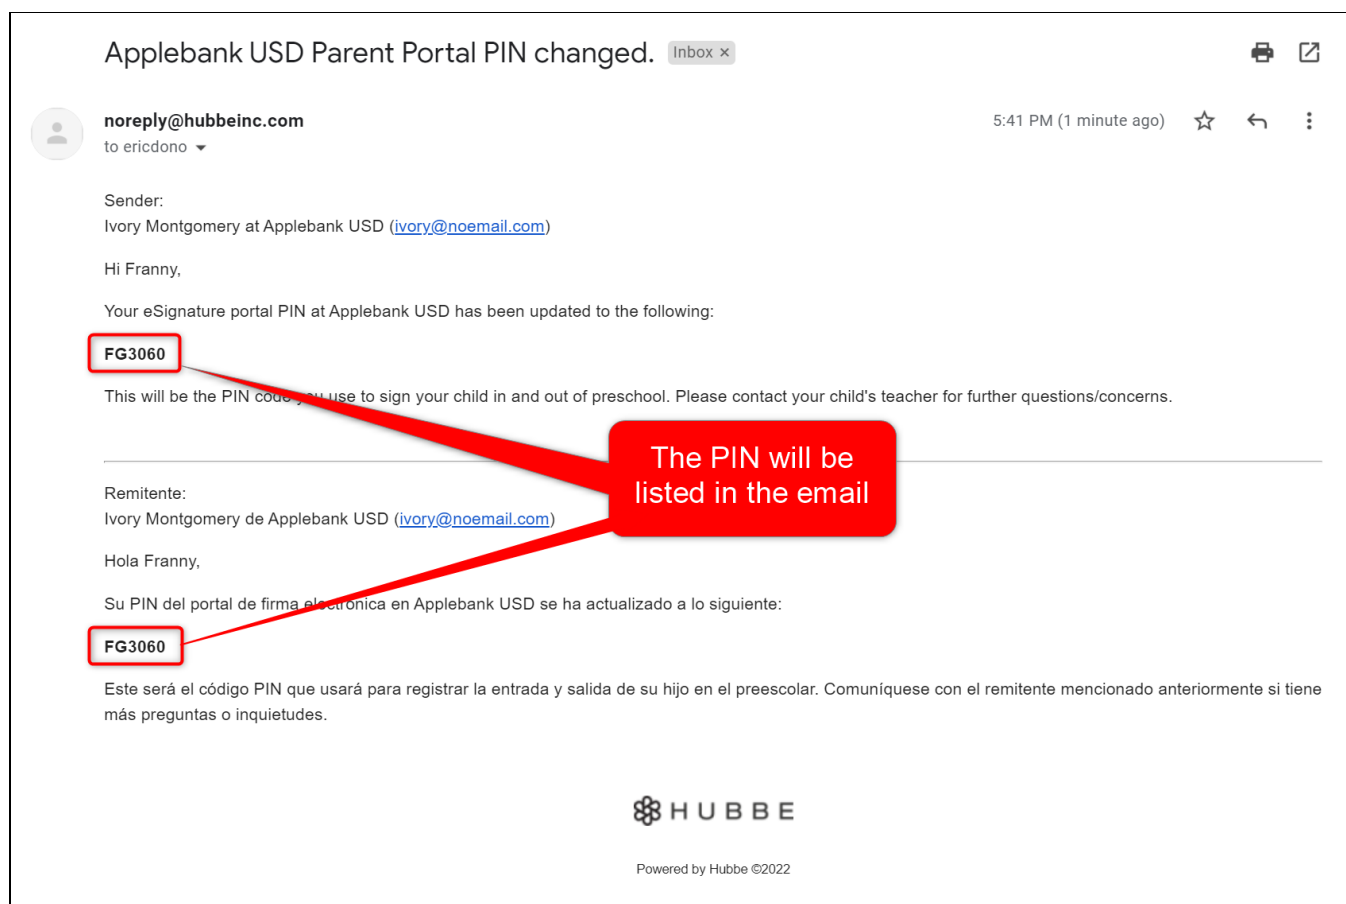

5 Clicking on the "Reset Parent Pin" option will open up the modal shown below. In the text space provided, enter the new parent pin for this parent, and click on the blue "Save" button. You may also check the box for "Send email to parent" to email these changes to the parent, if desired. This will update the Pin immediately, making the previous Pin no longer usable.

to ericdono

Sender:
Ivory Montgomery at Applebank USD (ivory@noemail.com)

Hi Franny,

Your eSignature portal PIN at Applebank USD has been updated to the following:

FG3060

This will be the PIN code you use to sign your child in and out of preschool. Please contact your child's teacher for further questions/concerns.

The PIN will be listed in the email

Remitente:
Ivory Montgomery de Applebank USD (ivory@noemail.com)

Hola Franny,

Su PIN del portal de firma electrónica en Applebank USD se ha actualizado a lo siguiente:

FG3060

Este será el código PIN que usará para registrar la entrada y salida de su hijo en el preescolar. Comuníquese con el remitente mencionado anteriormente si tiene más preguntas o inquietudes.

1 In addition to resetting the Parent's email/password/parent pin, you also have the option to disconnect their parent portal account entirely. Doing so will block the respective parent from being able to login into the parent portal unless a new parent portal account is created for them.

In order to disconnect a parent portal account, first locate the family account that you would like to modify. You can use the search bar to quickly look up the email, parent name, or student name. You can also sort each column in either ascending or descending order to easily organize the grid.

2 Once you have located the family account, click the "Actions" button on the left-hand side of the grid. This will expand to show a list of several fields, click on the one labeled "Disconnect Account".

3 A modal will pop up, asking if you are sure you want to disconnect the parent from their portal account. If you are certain this is the action that you wish to take, click on the red "Delete" button. Otherwise, click on the "Cancel" button to go back to the grid.

The second tab displayed on the page titled, "Parents with Pending Accounts" includes a grid listing all parents at the agency that need to **verify their account's email address**. They can do this by clicking the verification link sent in an email upon creating their account or by accepting the agency under the agency dropdown at the top right of their parent portal homepage. This section will review the actions and features available in this tab.

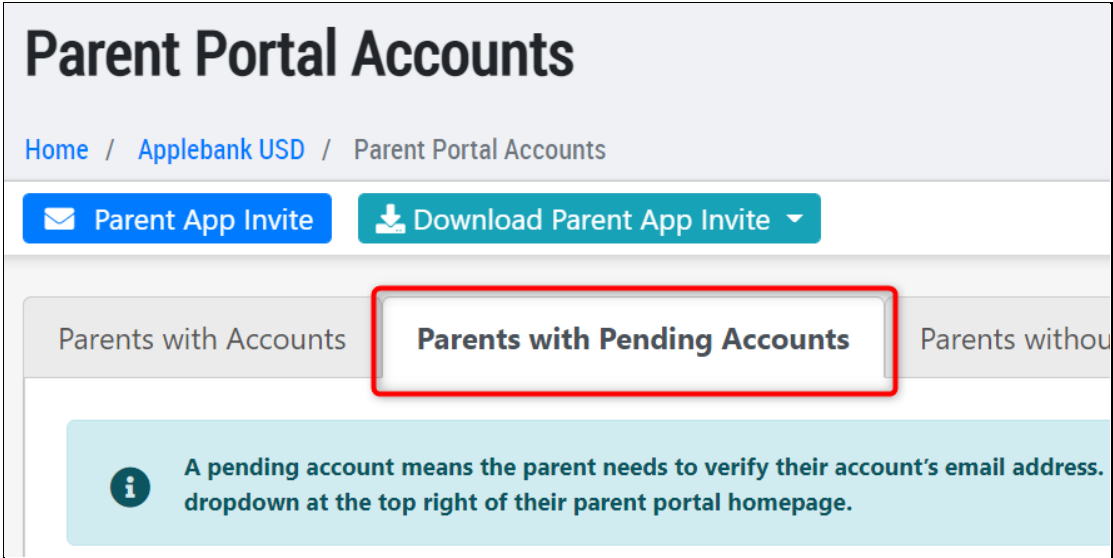

Re-send Verification Email

---

1   Parents who are housed within this tab shouldn't be there for long. Oftentimes the reason they still have their account pending is because they never clicked on the verification link sent to their email originally. In order to make it as easy as possible, you have the option to re-send the verification to one or more parents from the grid. To do so, first check the boxes next to the parents that you want to re-send the verification email for, then click on the blue button labeled "Re-send Verification Email"
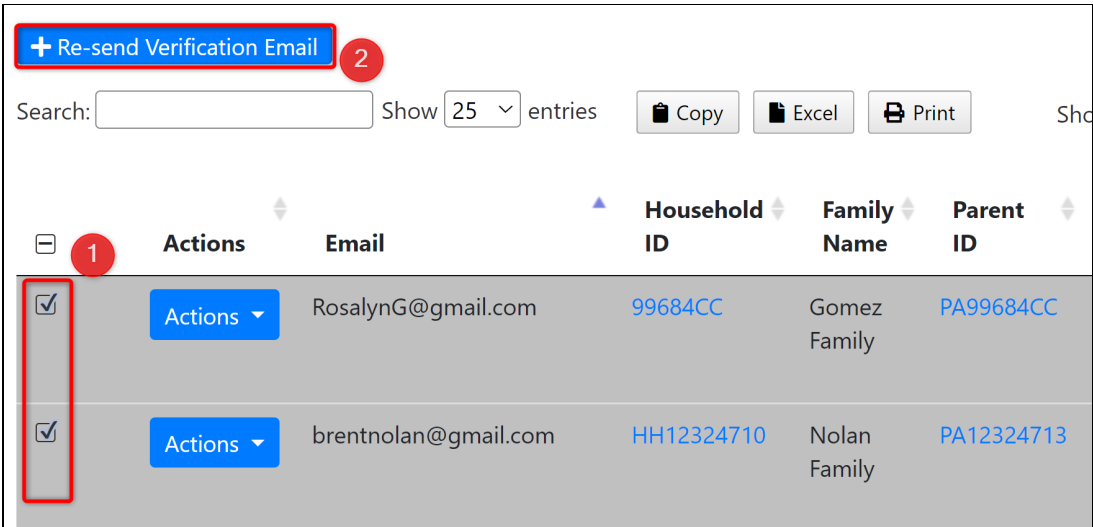

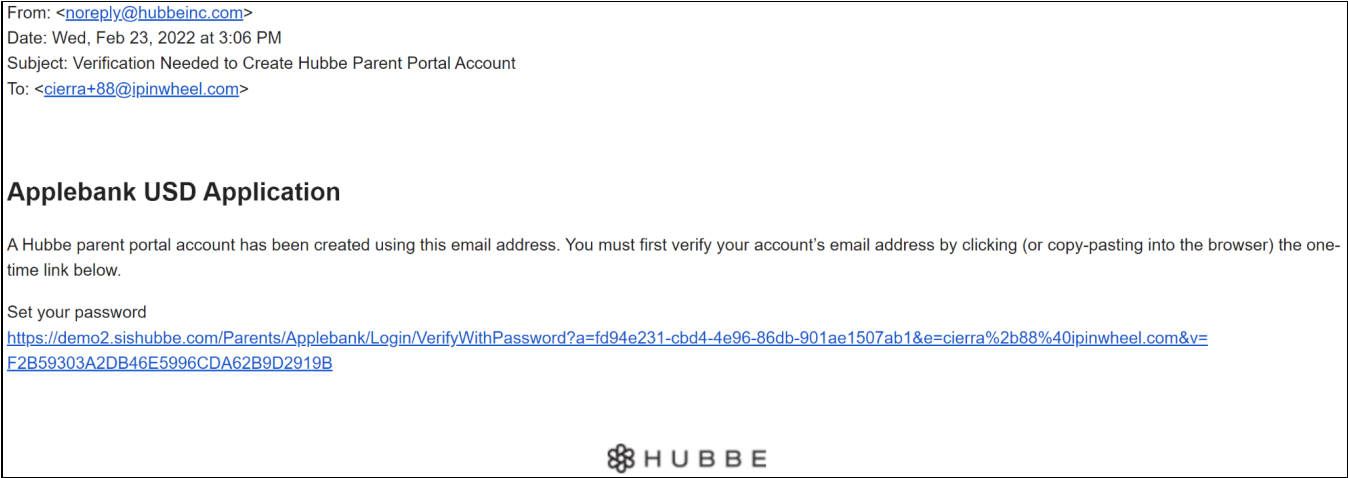

2   This will open up a modal confirming that you want to resend the verification link to the parent(s) that you selected in the grid. You can click on the blue "Save" button to finalize your decision, and send the reminder emails with the verification link included.

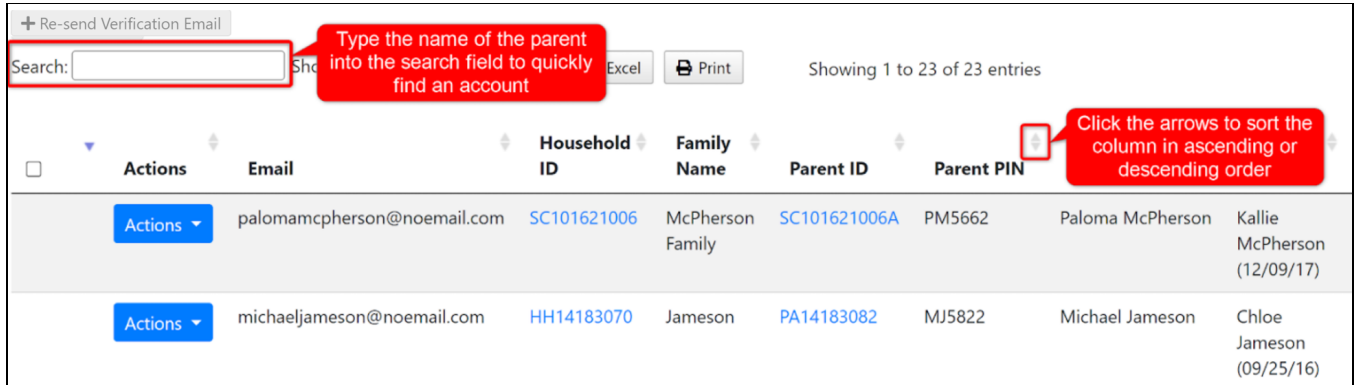

3   The email sent to the parent will be displayed in the email, as seen in the image below.

1   You also have the option to disconnect their parent portal account entirely. Doing so will block the respective parent from being able to login into the parent portal unless a new parent portal account is created for them.

In order to disconnect a parent portal account, first locate the family account that you would like to modify. You can use the search bar to quickly look up the email, parent name, or student name. You can also sort each column in either ascending or descending order to easily organize the grid.

2   Once you have located the family account, click the "Actions" button on the left-hand side of the grid. This will expand to show one option, click on the one labeled "Disconnect Account".

3   A modal will pop up, asking if you are sure you want to disconnect the parent from their portal account. If you are certain this is the action that you wish to take, click on the red "Delete" button. Otherwise, click on the "Cancel" button to go back to the grid.
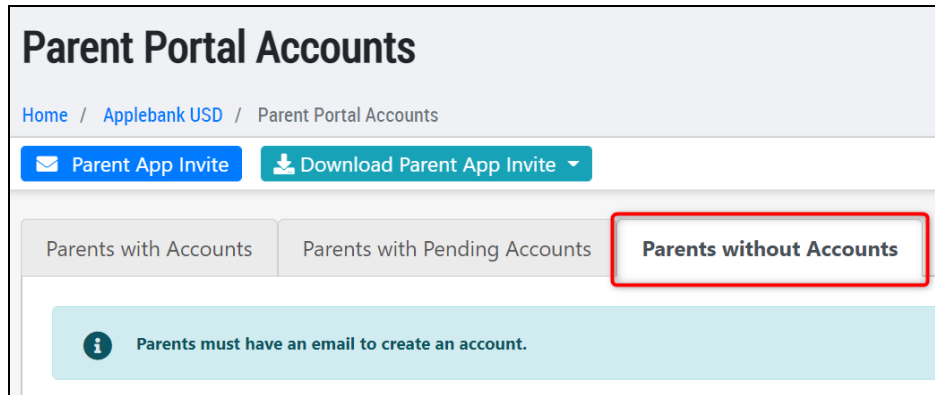

The third tab displayed on the Parent Accounts record titled, "Parents without Accounts" includes a grid listing all parents that have a parent record on your system but have yet to have a parent portal account created for them. In this tab, you can create a parent portal account, which will transfer that parent to the "Parents with Pending Accounts" tab.

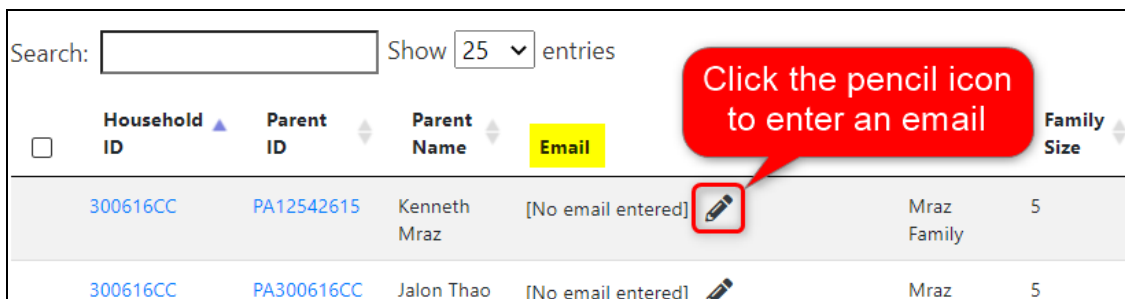

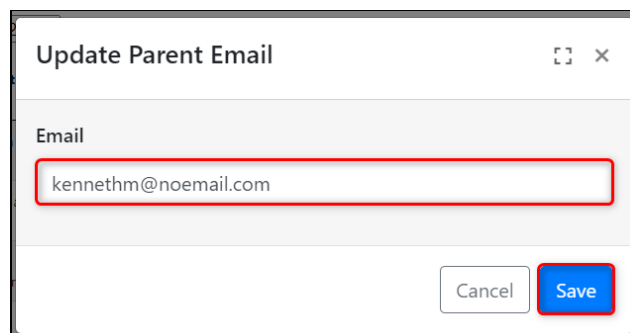

Enter/Update Email Addresses

1 The parents listed in this grid have been entered into *Hubbe* without a parent portal account. To create a Parent Portal account for a parent here, you must first enter their email address if they do not already have one.

To enter or edit an email address for a parent in the grid, click the pencil button next to the email (or lack of email) in the "Email" column.

2 In the modal that appears, enter the parent's email address and then click "Save."

3   You will notice the updated email address in the "Email" column. There will also now be a checkmark to the far left of the parent's row, which can be selected to create a portal account for that parent. Please refer to the next section to learn how to create a parent portal account.

Create Parent Portal Accounts

---

1   To create a Parent Portal account for a parent listed in the grid, first select the parent by checking the box to the left of their "Household ID." Please note that the parent must have an email address to create a portal account. The checkbox to select the parent will not display until an email is created, which you can find instructions for in the previous section.

To use the search filters to sort through the grid, click on the blue "Edit Filters" text and select/enter your desired filters.

Once you have selected your desired filters, click "Apply filters" to apply all selected filters. If you would like to clear all selected filters, click the "Reset" button.

To use the search bar, simply type information pertaining to the parent you're looking for into the text field, which can be information from any of the columns listed on the grid such as the parent name.
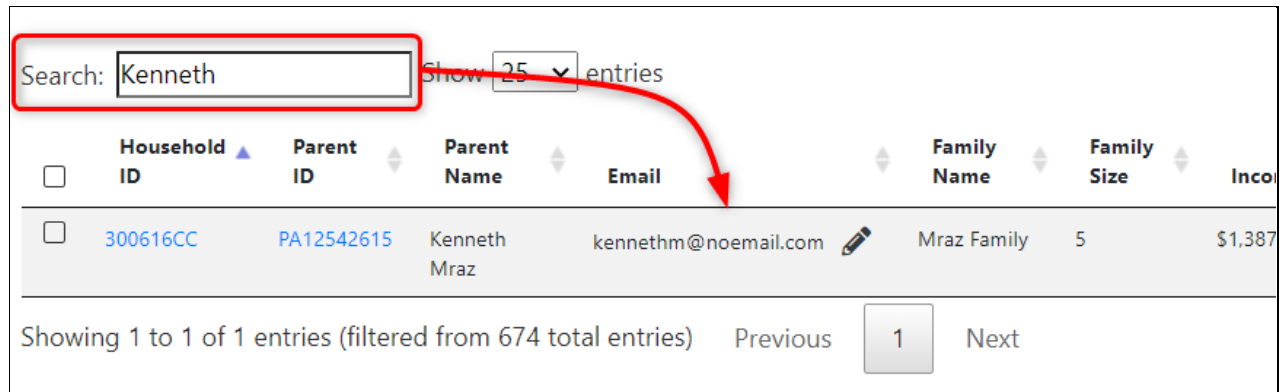

2   Once you have selected all the parents you would like to create a portal account for, click the blue "+Create Portal Accounts" button at the top of the page.

3   In the modal that appears, the number of parents you have selected to create a portal account for will be listed. An email will be automatically sent to each parent with information on how to login and the verification link to lead them to the login page. Click "Save."
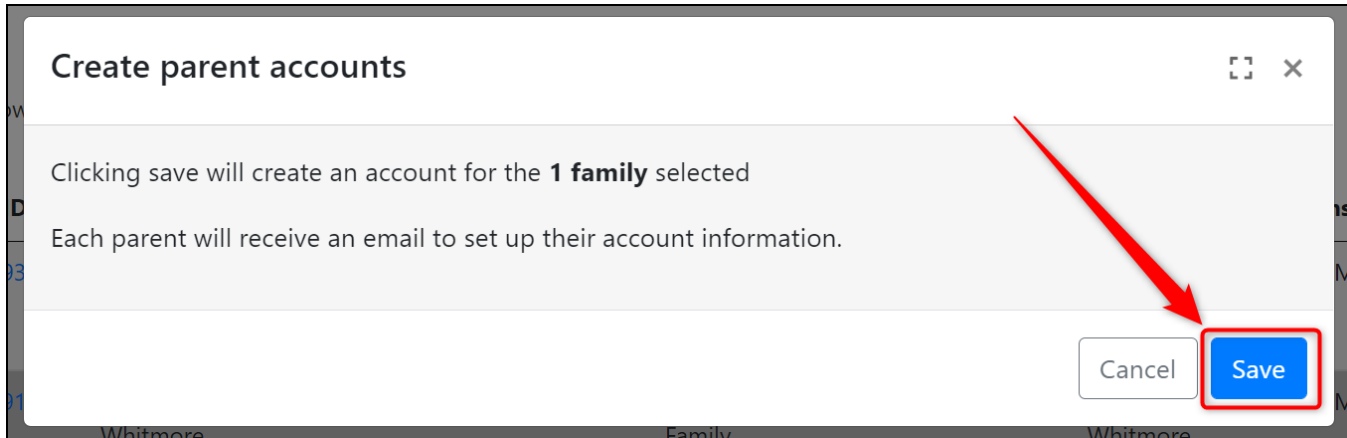

4   The account will then be created and the parent will be moved to the "Parents with Pending Accounts" tab on this page.

The email sent will look like the one in the image below.
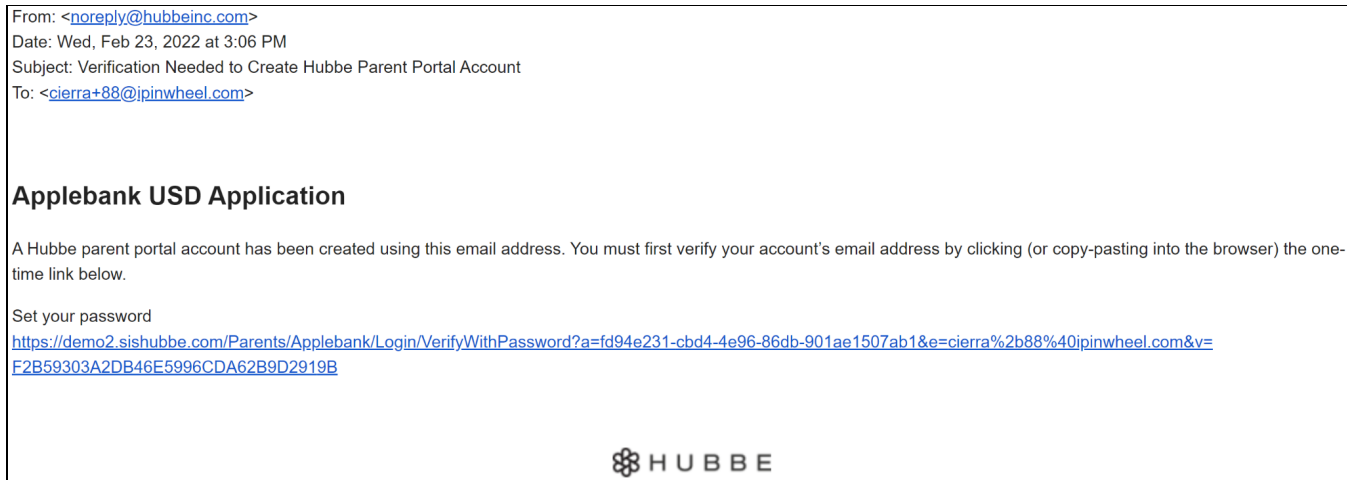

In addition to managing parent portal account information, you also have the ability to easily share download information for the Hubbe Parent App. The Parent Hubbe App is available on the Apple App store or the Google Play store. From the App, parents can login to their parent portal accounts and view all relevant information from a convenient platform.

In this section we will show you how to quickly and easily share steps on how to download the Hubbe Parent app with your parents. You can do this with an email invite directly from the grid, or through utilization of a PDF download.

1 In order to invite parents to the Parent Hubbe app, click on the blue button at the top of the page labeled "Parent App Invite".
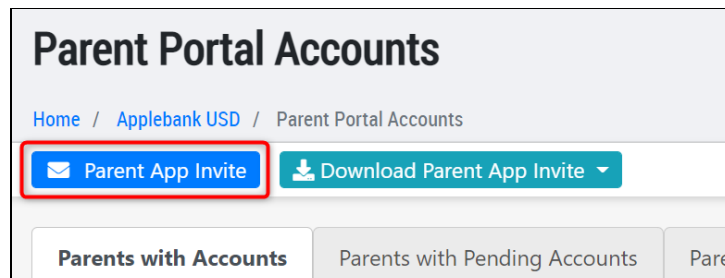

2 A modal will pop up, with fields for Recipients, Subject, Body, and Attachments. By default, there will be no recipients, so you can enter the parent emails in the text field provided.
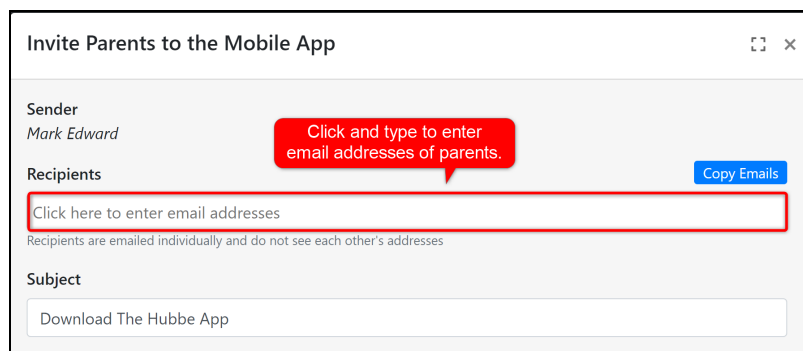

3 You can also enter a subject line for the email as well. By default, the subject line will read "Download the Hubbe App", but this can be edited to whatever you want it to read.
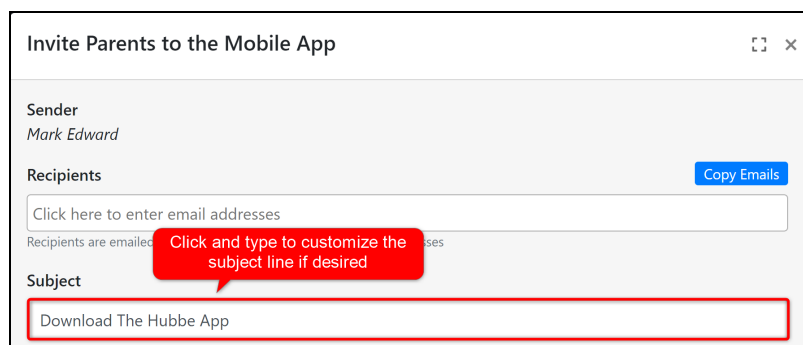

4 You can also enter a subject line for the email as well. By default, the subject line will read "Download the Hubbe App", but this can be edited to whatever you want it to read.

Your Agency Logo will appear here.

Dear Parent/Guardian

You have been invited to use our Hubbe Parent app. Once you have downloaded our app on your phone either scan the code below from another device or click the link below using your device.

QR Code for parent to scan once app has been downloaded.

https://demo2.sishubbe.com/Home/OpenApp?AgencyKey=fd94e231-cbd4-4e96-86db-901ae1507ab1

6   You even have the option to add attachments to the invite email before sending as well, just click on the "Choose Files" button at the bottom of the modal, and select the file that you wish to attach.

7   When you are happy with your recipient list, subject, body, and attachments provided, you are ready to send the email. Click on the blue "Send" button to send out an email to all your parents inviting them to download the Parent Hubbe app.
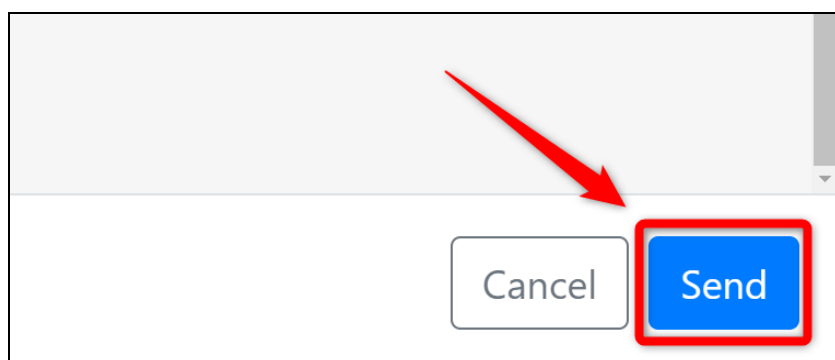

Download Parent App Invite

In addition to emailing users from the grid, you may wish to print out or share a PDF download with them instead. In order to download the PDF for the Parent App Invite, click on the blue button at the top of the page labeled "Download Parent App Invite", and select your desired language.
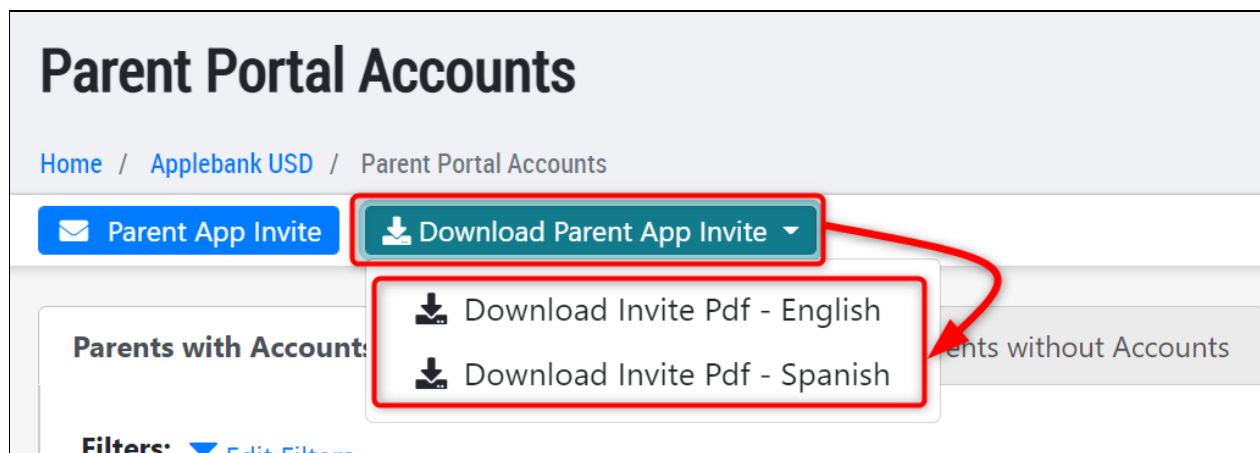

Doing so will download a PDF of the instructions to download the Hubbe Parent app from the Apple App Store or Google Play Store. You can print out this download and share with them or email it to them.
